

ELS3 Electric height adjustment for sit-stand workplaces

Flexible modular system for sit-stand workplaces

With the modular system ELS3 you can construct four different table frames. The striking feature are their solid design, easy assembly and the wide range of applications. The frames were specifically designed for our ELS3 range of adjustable legs (see pages 4 and 5) controllers and switches (see pages 10 and 11).

ELS3 Electric lifting columns

at a glance

With the electrical lifting column ELS3 from SUSPA you can easily change your working position from sit to stand. The main features of the lifting columns are elegant design, quiet movement (<48dB) and a long adjustment range. All ELS systems have the option to have collision detection, which will stop the system automatically if an obstruction is detected.

Accessories and switches

Accessories

The highly efficient control boxes have a flat and compact design. In combination with the switches they guarantee a reliable and economical operation of the tables.

SMARTneo controller

- low standby power consumption: $\leq 0,1\text{W}$
- Soft-Start and Soft-Stop
- integrated anti-collision sensor with high sensitivity (light barrier)
- integrated anti-collision software ISP installed
- weight: 312 g
- dimensions: 188x85x35 mm
- controls for EU- and US-voltage available
- supply voltage
EU: 220 - 240 VAC / 50-60 Hz, US: 100 - 120 VAC / 50 - 60 Hz
- nominal voltage
EU: 230 V / 50 Hz, US: 120 V / 60 Hz
- output voltage: 240 W (2-leg) 24 VDC
- operating time 10 % at maximum load (1 min/9 min)
- sit/stand memory for basic hand switches is possible

COMPACT controller

- low standby power consumption: $\leq 0,3\text{ W}$
- Soft-Start and Soft-Stop
- overload protection
- weight: 418 g / 523 g (3-leg-controller)
- dimensions: 264x103x37 mm
- controls for EU- and US-voltage available
- supply voltage
EU: 207 - 254,4 V / 50 Hz, US: 90 - 127 V / 50 - 60 Hz
- nominal voltage: 230 V / 50 Hz, US: 120 V / 60 Hz
- output voltage: 288 VA (2-leg) 24 VDC / 360 VA (3-leg) 24 VDC
- operating time: 10 % at maximum load (1 min/9 min)
- external sensor collision detector possible with LOGIC-CONNECTOR

Communication and Connectivity LOGIClink

LOGIClink provides connectivity and control, allowing for communication and customization of the user's work environment.

Ergonomics at the workplace

Over the last few years, SUSPA has become established as one of the leading suppliers of electric height adjustment systems. The topic of ergonomics at the workplace has increasingly gained importance in companies as well in recent years.

Since more and more people are experiencing back problems due to a lack of movement, it is not only the personal well being that is affected, but there is also enormous economic damage done through absences from work. The best way of countering the lack of movement in the office is to use sit-stand desks.
